Wake the Motor (New Installation)

1. Press and hold the Motor button for 3 seconds
   a. The LED light will then blink green, and the louvres will begin to move as it calibrates itself

Do not interrupt the shutter during this process. When completed, the louvres will finish in the open position

Before following the instructions below, please check that the G4 PerfectTilt system is not already configured. The Remote(s), Motors, and Hub are designed to be pre-programmed in the factory and do not require further set-up.

Add or Remove Shutter(s) from a Remote Channel

1. Press the Motor(s) button for 1 second
   a. The LED light will then blink green, and the louvres will move to the open position
2. Press and hold the SET button on the Remote for 3 seconds
   a. The Remote buttons will pulse white
3. Press the Channel (1-5) for the Motor to be added to or removed from
   a. If the Motor is added, the louvres will respond once
   b. If the Motor is removed, the louvres will respond twice
4. Press and hold the SET button on the Remote for 3 seconds

Set the Favourite Position (☆)

1. Press the BestPrivacy button 🏠 on the Remote
   a. The louvres will move to the closed position
