

ShadeAutoTM Hub & APP

SHADEAUTOTM HUB | SETUP INSTRUCTIONS

The ShadeAuto[™] Hub connects to a home network for the ease of motorized window treatments control. Experience the convenience of customization with scene, schedule as well as voice control via Google Assistant, Amazon Alexa and Apple HomeKit.

THE APP ALLOWS FOR:

- 1. Home (all rooms), individual room, groups of and/or individual window treatments control.
- 2. Control the window treatments remotely through Wi-Fi or Ethernet.
- 3. Scene control: Personalize window treatments control and save preferred positions for your window treatments to automatically adjust to for daily routines.
- 4. Schedule: Set different times for your window treatments to automatically adjust (lower and raise etc.) to designated scenes and positions.
- 5. Compatible with smart home platforms.
 - Amazon Alexa
 - Google Home
 - Apple HomeKit

GETTING STARTED:

In order to have the complete experience of the motorized window treatments control through the ShadeAuto[™] app, you will need to have:

- Downloaded the free app via the App Store (iOS) or Google Play Store (Android).
- Purchased one or more ShadeAuto[™] Hubs depending on the size of the area or rooms you would like to cover.
- Ensured your Wi-Fi or Ethernet is working and stable.
- Familiarized yourself with the app navigation guide below.
- Our step-by-step guide will let you understand the app more easily.

ShadeAuto[™] Hub TECHNICAL SPECIFICATIONS

- Radio Frequency 2.4 GHz
- Wi-Fi Support both 2.4 & 5 GHz
- Support Ethernet
- Input Power: 5V DC / 1A
- For Indoor Use Only
- Radio Frequency Range: 30 meters or 98 feet (no shielding)
- Operation Temperature: 0°C 45°C (32°F 113°F)
- Storage Temperature: -10°C 65°C (14°F 149°F)
- Power Cable Length (USB Type C): 100 cm or 39.4"
- Protection Class: IP20

CAPABILITIES:

- Accounts per Hub: 10
- Remotes per Hub: 20
- Devices per Hub: 100
- Scenes per Hub: 32
- Schedules per Hub: 100

SETUP TIPS:

In real life, the signal transmission path is shielded by many factors like RF signals from other sources, home furnishings, and wall partition and etc irresistible factors. Therefore, some customer may need Repeaters to enhance signal transmission if necessary. Please refer to below setup tips for easy installation.

- The ShadeAuto[™] Hub must be within signal range of both motorized window treatments and connected via Wi-Fi or Ethernet. Please set hub position at the no shielding center place in house.
- ★ Please note the distance between the devices (Hub, Repeater, or window treatments) should be in the visible range and less than 10 meters to ensure stable signal transmission.
- ★ If the signal needs to pass through different floors, it is recommended one Hub to be installed per floor/level.
- ★ It is recommended to have Repeaters in line-of-sight of the Hub and one per room to ensure good signal coverage.
- \star The max repeater quantity is 5pcs for the same space, and it is not recommended to transfer signal more than 2 hierarchies.

 \star For More Information of Repeater, please refer to section "REPEATER".

SMART HOME SOLUTION:

SHUTTERS BUINDS SHADES

- ◆ The third smart home solution is only able to support simple operation. For precise and complicate operation, please always use ShadeAuto[™] for better performance.
- ◆ Please always finish setup of ShadeAuto[™] before building connection with the third SmartHome solutions.
- For Shutter, it's about 37% open when slat is tilted to horizontal position.
- For Cellular Shade TDBU and Day & Night, independent middle rail operation is not available via the third SmartHome solutions.
 Middle rail will always move to top automatically.
- For PerfectSheer Shade, tilt function for vane is not available via the third SmartHome solutions.
- ◆ Pre-set My Favorite Position, Best View and Best Privacy by ShadeAuto[™] cannot be voice commanded by the third Smart Home solution.
- Third party SmartHome solutions only support single device from ShadeAuto[™].
 Room(s) / Group (Channel), and Schedule control from ShadeAuto[™] is not supported in the third SmartHome solution. For multiple device operations, please consult setup instruction of the third part SmartHome solutions.

1. Build Connection between ShadeAuto[™] and Alexa

REPEATER:

QUICK START GUIDE:

1. Plug USB power adapter into a power outlet.

Only use authorized USB Power adapter with USB Repeater. Using other adapter / power sources may adversely affect USB repeater performance and should be avoided.

- Plug the USB Repeater into the USB power adapter. The repeater will flash white light once plug on.
 USB Repeater will join the Hub network during installation. No setup needed.
- 3. Do any control by a remote control or via ShadeAuto[™], the white light on the repeater will flash. This means the repeater is transmitting the signal.

IMPORTANT!

Maximum of 5 repeaters can be used in a same room. DO NOT cover the repeater with a metal shield.

SPECIFICATION

NO	Item	Specification
1	Power source	5V, 1A, USB A type plug
2	Radio type	Proprietary 2.4G RF
3	Radio distance	10 meters
4	LED	White LED 1pcs
5	Power consumption	<150mW
6	Operation temperature	0°C - 45°C (32°F - 113°F)
7	Storage temperature	-10°C - 65°C (14°F - 149°F)
8	Dimension (mm)	L64.85 x W18 x H9
9	Weight (g)	7.2g ; +/- 0.5g
10	Color	Pantone Black

Safety Statement

Federal Communication Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- . Reorient or relocate the receiving antenna.
- . Increase the separation between the equipment and receiver.
- . Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- . Consult the dealer or an experienced radio/TV technician for help.

FCC Caution:

To assure continued compliance, any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

(Example - use only shielded interface cables when connecting to computer or peripheral devices).

FCC Radiation Exposure Statement

This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This equipment should be

installed and operated with a minimum distance of 20 centimeters between the radiator and your body.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

The antennas used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and

(2) This device must accept any interference received, including interference that may cause undesired operation.

IC statement

This device complies with Industry Canada license-exempt RSS standard(s).

Operation is subject to the following two conditions:

- (1) this device may not cause interference, and
- (2) this device must accept any interference, including interference that may cause undesired operation of the device.

ISED statement (France):

L'émetteur exempt de licence contenu dans le présent appareil est conforme aux CNR d'Innovation, Sciences et Développement économique Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes :

- (1) L'appareil ne doit pas produire de brouillage;
- (2) L'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

Frequency range:

	FCC	IC	CE
Wi-Fi 2.4 GHz	2412 – 2462 MHz	2412 – 2462 MHz	2412 – 2472 MHz
Wi-Fi 5 GHz (Band 1 & 2)	5180 – 5320 MHz	5180 – 5320 MHz	5180 – 5320 MHz
Wi-Fi 5 GHz (Band 3)	5500 – 5700 MHz	5500 – 5580 MHz 5660 – 5700 MHz	5500 – 5700 MHz
Wi-Fi 5 GHz (Band 4)	5725 – 5850 MHz	5725 – 5850 MHz	N/A

EU: max. EIRP: 20 dBm (2.4 GHz) / 23 dBm (5 GHz)
